AIM BY ADSMENTOR

The ad account ownership checklist

A 30-minute setup that keeps your data and money in your hands.

From the case study and book *The Ad Account Nobody Shows You* by Kailas Nath R and Kautilya Roshan.

Before anyone runs your ads

☐ Create the ad account yourself, under your own business profile.
☐ Create the Business Manager (or equivalent) yourself and be the admin.
☐ Add your payment method yourself. Never hand over card details.
☐ Create your own pixel or tag and keep the login.

When you give access

☐ Give the freelancer or agency partner access, not admin ownership.
☐ Write down who has which role, and review it every month.
☐ Keep two admins so you are never locked out.

Every month

☐ Download your reports and keep a copy of your audiences and creatives.
☐ Check the billing and spend limits.
☐ Remove access for anyone who no longer works with you.

Why it matters
One setup shortcut can cost a business six months of ad data. Ownership takes thirty minutes to set up and years to rebuild.
